

Solution of the Assignment 1

I have solved the assignment.

Most of the code is just checking if the input is in the correct format.

Calculation is in the vectorized form, not a single loop is explicitly used.

Calculation in Grade.m and Score.m is "one liner"

Calculation in HowManyPercent.m is on three lines. Just for better readability.

Functions were tested on the input from Moodle .

Code is with comments, so I think there is nothing much else to say.

Solutions are in the three function files:

Grade.m

Score.m and

HowManyPercent.m
